JavaScript Basics Tasks

1. Print Basics

Write a program to print:
Hello, Welcome to
JavaScript!

2. Comments Practice

Add:

One single-line
comment

One multi-line
comment

3. Variables Practice

Create variables using:

- let
- const

Store your:

- name
- age

4. let vs const

Try changing a let variable

Try changing a const variable

Check What happens?

5. Camel Case vs Pascal Case

Create variables using Camel case and Pascal case & Print both.

6. Data Types Identification

Create variables & Print All for:

- string
- number
- boolean
- null
- Undefined
- Array
- Object
- Function

7. Array Practice

Create an Array with 8 string values and print each value one by one

8. Object Practice

Create an object containing 5 Key-Value pairs and print each value one by one using dot & bracket notation

9. Arithmetic Operators

Perform:

- Addition
- Subtraction
- Multiplication
- Division
- Modulus
- Pre & Post Increment
- Pre & Post Decrement

Use any two numbers.

10. Function Practice

Create a function and print
"Playwright is a powerful
automation tool" when called

11. Comparison Operators

```
5 == "5"
```

```
5 === "5"
```

Print results and observe
difference

12. Logical Operators

Implement any condition using
logical operators:

- Print true using AND Operator
- Print false using OR Operator
- Print Opposite of False using NOT Operator

13. Conditional Statement (IF):

- Create a variable age. If age is greater than or equal to 18, print 'Eligible to vote'.

14. Conditional Statement (IF-ELSE):

- Create a variable marks. If marks are greater than or equal to 40, print 'Pass'; otherwise, print 'Fail'.
-

Bonus Tasks

15. Conditional Statement (ELSE-IF) :

- Create a variable score.
- If score is greater than or equal to 90, print 'Grade A'.
- Else if score is greater than or equal to 75, print 'Grade B'.
- Else if score is greater than or equal to 50, print 'Grade C'.
- Otherwise, print 'Fail'
